DEUXERVEIL

Technique Inspiration

The hair design created by your skillful technique and ample inspiration is now embodied by DEUXER.

DEUXERVEIL hairspray has double-effect features that care damaged hair while styling it.

It brings shiny moisture feeling to the hair and keeps it with the style hold.

By manipulating 4 different types, you can freely create any style and texture.

Inspiration meets functionality. Holding combined with texture.

Two different factors now become one creating DEUXER.

Like a transparent veil, DEUXERVEIL can lead to free and elegant hair design.

SMOOTH SHINE 1

For shine and suppleness

Like a transparent veil, the fine mist softly spreads over the hair creating supple smooth hair. Best for used on damaged dry or unruly hair. It brings brilliant shine from inside of hair while giving soft and smooth texture up to the hair ends.

How to use Spray both inside and outside of hair. Once it absorbed, unruly hair becomes supple and clean.

Alternatives Spray on wet hair for light and sleek feel. Spray on dry hair for shiny feel up to the hair end.

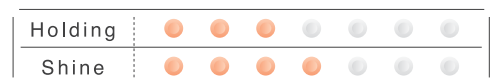

DEUXERVEIL 1 170g

MOVE ARRANGE 3

For soft movement

It brings soft free movement to create natural-look style. Like hair wax does, it slowly holds the hair without becoming too firm. Ideal for creating soft volume, rough-piece texture and movement.

How to use Spray on whole hair, then style.

Alternatives Spray while loosening curls to create airy softness. Create root-up volume.

DEUXERVEIL 3 170g

BOUNCE HARD **5**

FREEZE HARD **7**

For strong hold without stiffened

Mild mist evenly gets into the rough-piece texture and hold hair tightly from inside. Its elastic holding can create non-stiff natural style. It can be used over the finished style by hair wax or styling foam for even longer-lasting hold.

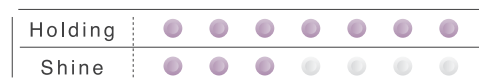

How to use Spray at the finish of styling for long-lasting hair style without stiffness.

Alternatives Take a little further distance from the hair and spray the whole hair for keeping style and movement. Take a closer distance to spray any specific part of hair for extra holding.

DEUXERVEIL 5 170g

For quick-dry extra holding

Its quick-dry extra holding freezes the hair style even against the wind. It holds up-do style or pointing-up hair for all day long. Best for men's short styles emphasizing pointing-up texture.

How to use Spray the focused mist to specific part for making frozen-like state.

Alternatives Take a little further distance from the hair and spray the whole hair for firm holding of the style. Take a closer distance to spray any specific part of hair for extra holding.

DEUXERVEIL 7 170g

Point of DEUXERVEIL

Simple yet unique performance

Whenever you use DEUXERVEIL, you can experience this specific feature.

- Any hair design can be manipulated by 4 types of DEUXERVEIL.

Although the numbers indicate 4 levels of holding power, they also have different lightness, suppleness and mist emission enabling it to widen the versatility of styles created. Use your inspiration to choose or even to combine with other hair waxes or styling products to freely create the hair styles or to match any specific client needs.

- “Veil Care” effect

The “Veil Care” effect means to protect hair from damage while styling it. This effect brings brilliant shine from inside of hair while giving soft and smooth texture up to the hair ends.

“Veil Care” ingredients

Hibiscus extract

Protects hair from external circumstances like sunlight and keeps the moisture of hair.

Macadamia nut oil

Smoothens the surface of cuticles and gives brilliant shine to hair.

- Green apple based fruity mint fragrance

Once you spray it, you can feel the fresh fruity mint scent. The scent spreads gently, and it does not leave strong scent to the hair after styling.
